### Play Hunting Games

Do you like to play hunting games either on the computer or on your video game console? The good news is that you have many choices available to you on both fronts. With the technology that is evolving today in both the software and computer industry as well as with video game consoles, you can play hunting games that are not only realistic, but fun and exciting as well.

Some of the most popular ways to play hunting games is to so online at various websites that offer interactive gaming. You can choose to play against yourself or against other people all over the world. These types of hunting games can be found in a variety of places. In fact, when we did a Google search, we found hundreds of websites that allow you to play hunting games online. Even ESPN has an interactive hunting websites with various choices as to what type of game you want to hunt.

Original hunting games for video consoles such as Nintendo and Play Station have evolved over the years into sophisticated programs that allow you to gain experience. The better you get at the game, the more levels you most up in the game. When you play hunting games on a video console, you may have to buy additional equipment such as laser guns in order to hunt your pretty, but for those who like to play hunting games, it's a worthwhile investment.

Some people say that when you play hunting games, you can improve your real-life hunting skills. You have to be aware of your surroundings in these games because the settings are realistic and the sounds mimic real-life situations. When you can track a deer or any other game in the video game, you may find out that it is easier to track a deer or any other prey in real life. Even these games require patience and waiting, so you are getting some training for your next hunting trip.

If you like to play hunting games, you have hundreds of choices at your disposal. Whether you decide to play online, buy hunting software for your computer, or play on your video game console, you can choose to hunt bear, elk, deer, and even go fishing all from the comfort of your own home! Plus, it is fun and exciting to play hunting games – especially if you like to hunt in real life.

### Duck Hunt

The very first hunting game that was developed happened way back in the 1980's and was called Duck Hunt. It was developed for the Nintendo game system and was the first of its kind "back in the day". The game required a special controller that looked like a gun and you would shoot ducks with a special light that was programmed to respond with the system. From the first day that Duck Hunt came on the scene, it became immensely popular with gamers.

The graphics in Duck Hunt were very basic, especially when compared to what we have today. You had a basic outdoor setting with a few trees and bushes and the ducks would come into view from various angles so you could shoot them. You also had the option of shooting clay pigeons with Duck Hunt as well. You were accompanied by a nameless hunting dog that would laugh if you missed a bird and clap when you got one.

As you became better at shooting the ducks, you would move up levels in Duck Hunt up to level 99. As with other early video games, there was not really a proper ending to speak of in Duck Hunt. After the player had advanced to level 99, the next level would be 00. At that level, you would hear the flapping of wings, but no ducks would emerge. After ten non-duck appearances, the game would end. A different version of this shows the dog laughing at the beginning of round "0" (rather than level "00"). The ducks then start appearing randomly in the background instead of flying in the normal manner; this happens 3 times. After that the dog keeps laughing until the words "game over" appear.

There were very few reviews done on the game Duck Hunt, but while it was initially popular with gamers early on, critics were not big fans. One critic says that while the game is fun for a short time, eventually it became old after a few rounds of play. Even so, players liked the way Duck Hunt played especially with the special gun controller because it simulated real life duck hunting.

Even though Duck Hunt was not especially advanced, it was at the time it was invented and it became the basis for some of the duck hunt games we have today. Computer programmers discovered new technologies and applied them to video games so that now the options include real looking environments, choices of weapons, and more advanced levels that make the games much more challenging. Duck Hunt began the video game hunting craze and helped it continue even today.

## Duck Hunting Game

Back in the 1980's, the first hunting video game that was developed was a duck hunting game for the Nintendo video game console. It required the use of a special laser gun and allowed you to shoot either skeet or ducks. You were accompanied by a hunting dog that would laugh if you missed a duck and clapped when you got one. The graphics were very basic and the landscape not very exciting, but this duck hunting game laid the base for technology to move forward to where we are today – having a variety of duck hunting games to choose from for all video game console platforms as well as on the personal computer.

There are many duck hunting game available for the personal computer – whether you use an IBM-based system or a Macintosh system. The software that is available today is much more advanced and gives lots and lots of options when it comes to your duck hunting experience. Software games that you install on your computer gives you various places where you can hunt along with choices of weapons and various sizes of ducks. A good duck hunting game that comes in software form will offer you an online demo on their web site so that you can try out the game before you actually buy it.

Just like with many other hunting games, you can also find a good duck hunting game online and often are able to play it for free. While not as advanced and in-depth as software versions, they are fun nonetheless and do not cost anything to play other than a bit of your time to register as a member of the web site and the web site's community.

When you are looking for a good duck hunting game, you will have to take into consideration what interests you the most. Do you just want to shoot a lot of ducks or are you more interested in laying in wait as ducks come into view from hiding and try to avoid your bullets? Maybe you want a combination of both in your duck hunting game with multi-player capabilities so you can play against friends.

Whatever you decide you want in a duck hunting game, we are sure you will be able to find it. Whether it is in your local video game store or an online retailer, there are lots to choose from and they are readily available. So go ahead and check out a duck hunting game, cock that trigger, and shoot away. Oh, and have fun!

## Deer Hunting Game

If you are a gaming enthusiast and a hunter as well, you will find so many places where you can get a deer hunting game that will satisfy both your love of hunting and your love of gaming. You have many choices when looking for deer hunting game including both software versions as well as online gaming. There are plenty of websites that have hunting games you can play online, or you can go for software versions that can be found in many department stores or at online places like Amazon and E-bay.

What should you look for in a deer hunting game? Well, it all depends on what you want to do and how you want to play. The software versions are more in-depth and offer you more choices than the online versions. You will have your choice of various environments to play in and possibly even more choices in the type of deer you can hunt. A good deer hunting game will have a variety of situations you can get yourself into and will let you move up level by level as you get better and better at the game.

Online versions of a deer hunting game will probably have fewer options for you to play, but they can be very exciting. You can choose to play against the computer or you can play against other players from all over the world. Almost all online gaming sites have communities with message boards where you can talk about your hunting prowess and get tips and tricks from other people. Plus, you can make new friends which is always a good thing when you love to play video games!

Finding a good deer hunting game is definitely not difficult. What we did was do a search on our favorite search engine – Google – but you can use any one that you like. Most of what is brought up on the screen will be the online gaming forums, but we also found game reviews for software versions. Here are some of the ones that intrigued us:

Hunting Unlimited 4

Deer Drive

Cabela's Big Game Hunter 2007

Deer Hunter 5

## How To Play And Enjoy Hunting Video Games

Many of these software manufacturers will offer a free demo of the deer hunting game online for you to try before you buy which can be great for you if you are not real keen on investing money in a game that turns out to be sort of lame! So, get out there hunting game enthusiast and find a deer hunting game that can keep you entertained for hours!

### The Beginning

Even though personal computers have been around for a very long time, they really became popular in the 1980's and have evolved into almost a necessity of life for many people.

However, video games really began with the invention of the Atari video game system, which would eventually evolve into more in-depth and more powerful game systems. One of the earliest hunting games developed was Duck Hunt, which was made for the Nintendo game system.

Duck Hunt required the use of a special Nintendo Zapper light gun that plugged directly into the system. Players would then wait for ducks to show up on the screen, which looked like a field. When the ducks came along, they would point and shoot.

They were accompanied by a faithful hunting dog who would laugh if the duck was missed and congratulate on a successful shooting. The game also allowed players to shoot clay pigeons if they chose.

There was really no ending in the Duck Hunt game, however there were playing levels. Depending on how good the player got, he or she would advance up to 99 levels at which point, the game would go to level 00. At that level, no ducks would appear, but you would hear wings flapping. After three times of no ducks appearing, the game would be "over".

After Duck Hunt, there were many other hunting video games that would begin to emerge on the market including Deer Hunter, Big Game Hunter, and Dangerous Hunts. Most of these games began for video game consoles like Nintendo, but the computer industry would soon become more and more involved as these games began to rise in popularity.

Today, there are hundreds of hunting video games for enthusiasts to choose from that have evolved into truly challenging games. Some may think that a point and click game where you can "down" a virtual deer might be a bit boring, but those who love these games disagree wholeheartedly.

## How To Play And Enjoy Hunting Video Games

They provide not only entertainment, but also a way to hone their hunting skills at any time of the day or night. When you spend a certain amount of time honing your tracking skills on the computer, chances are pretty good that you'll be able to use those skills while hunting for real.

## Can I Become A Better Hunter?

First and foremost, you will become familiar with various types of weapons. Of course, here we should say that if you do not know weapons before you hunt, you probably shouldn't be hunting in earnest in the first place. However, playing these types of games can familiarize you with hunting weapons, but it cannot replace actually getting out there and using those weapons.

To a certain extent, you will be able to work on your aim. A video game controller will give you a very lifelike replication of the crosshairs you will see through the scope of a gun or the way a peep sight looks on a bow and arrow. That means you can become familiar with what these tools are like to use and then take them into the field when you are hunting "for real".

Different weapons can perform in different ways. That means that there are some weapons that can do certain types of "damage" as opposed to others. While you will not be able to really, truly realize the ability of various weapons without actually seeing them perform, again, you can at least get an idea from a video game.

That means you can learn things like how far a shotgun shell can go, what distance you need to be at in order to inflict damage, the trajectory of an arrow, and much more. A shotgun shell will do much more damage than a single bullet from a pistol. Video games really do mimic the way regular weapons fire and inflict their damage!

If you are interested in real-life hunting for things like turkey and geese, you can use special man-made tools that will mimic the cry of these animals. Video hunting games also allow you to use these types of "calls" as they are known in the hunting world. By playing video hunting games, you can become more familiar with the sounds of different animals and make you realize what you are hearing when you are out in the forest!

So, there really is no definitive answer to whether or not video games can improve your performance as a real-life hunter. We believe that it is really up to the person what he or she gets out of training – and video game hunting really can be looked at as a training session for real-life hunting outings. The decision is up to you.

## To Cheat Or Not To Cheat

Many hard-core gamers think that using cheat codes is not acceptable. They feel like the game is meant to be played – not circumvented – and if you can't play the entire game, you shouldn't be playing the game at all.

Others say that using cheat codes actually makes the game more fun and challenging. Using cheat codes can reveal hidden information, give you access to restricted areas, and more.

Most of the cheat codes are designed to work with video games that are played on consoles like the Play Station and Nintendo systems, but you can also find cheats for PC games as well.

This writer isn't passionate one way or another about the use of cheat codes and has been known to find solutions to some of the puzzles in the Nancy Drew games that she is horribly addicted to. However, I use cheat codes as a last ditch effort to move forward in the game when I have tried fruitlessly to solve puzzles and the such.

So, if you are one of those people who don't believe in the use of cheat codes, skip this section. If you want to know the cheat codes for some of the more popular hunting games, we are going to give them to you.

There are so many games out there, so please don't be angry if we neglect to give you the cheat codes for your particular game. And please keep in mind that this book is about hunting video games, so that is what we will concentrate on in this section as well.

Cheat codes can be found in many places online. If you can't find what you want or need on one website, just search on another. They can be found quite easily by doing a Google search for "video game cheat codes

## Deer Hunter 4 Cheats

Deer Hunter is one of the most popular hunting games on the market today, and like many other games, it has cheat codes that can make the game more challenging thus causing gamers to constantly be on the lookout for Deer Hunter 4 cheats. That does not make the player and “cheater” per se, but what Deer Hunter 4 cheats do is bring new aspects of the game into play and make it more fun to play for gaming enthusiasts.

We're here to help and have found many Deer Hunter 4 cheats that you can use while playing Deer Hunter 4. This is not a comprehensive list as there are many, many cheat codes, but we can give you some of the more popular ones. First, while playing the game, press the F2 key, enter in the code, and then press the F2 key again. So here we go:

To make the animals not afraid of the hunter: dh4nofear

For the bullet view: dh4leadeye

To display debugging information: dh4breakdown

To enable all codes: dh4super

To go into flight mode: dh4skyhook

To get the gun sighted in: dh4sightin

Make it possible that the hunter never gets tired: dh4homegym

To become irresistible to animals: dh4beacon

Bring large deer into the picture: dh4monster

Make lightning in the sky: dh4zeus

For more gore: dh4f13

For no noise: dh4damper

To bring on rainy weather: dh4water

To bring on snowy weather: dh4ice

To make the sky thunder: dh4thor

To travel to the nearest animal: dh4find

To view the deer on a map: dh4showme

To view info on the nearest deer: dh4deerwatch

When using Deer Hunter 4 cheats, we think that you will find that the game becomes a bit easier, so if you are looking to be challenged, you may want to stay away from them. However,

## How To Play And Enjoy Hunting Video Games

a lot of people find that using Deer Hunter 4 cheats makes the game much more interesting to play. Because Deer Hunter 4 allows players to move up levels, using Deer Hunter 4 cheats makes it easier to move up these levels and become a better hunter.

You may want to check out some of the online communities that exist to chat with other Deer Hunter players. They often can offer up some Deer Hunter 4 cheats that are not listed in traditional places such as cheat web sites. You can also discuss the game with them and build up new friendships with people all over the world centering around loving to play Deer Hunter 4 and wanting to get more Deer Hunter 4 cheats.

### Nintendo

Because Nintendo was the first gaming company to come up with a viable hunting game, they were considered not only the innovators of this genre, but the rulers of it as well. With the original Nintendo system – pedantic by today's standards – gamers were excited at the prospect of using a laser gun to hunt down their prey via a video game console.

But the whole phenomenon began way before Duck Hunting was released!

The Nintendo Corporation was founded in 1889 in Japan. It was not originally intended to become a video game company. It was first conceived to become a leading producer of playing cards. In fact, its founders thought that they could form an electronics company that would be able to serve many very different functions that included the hotel business and a taxi company.

Eventually, as technology emerged, the founders of Nintendo realized that the real future of their business was in the electronic toy industry. They began doing research and found that this could be a very profitable venture. Their first video game came out in 1978 and was called “Computer Othello” based on the popular board game.

Nintendo became a video game mega-giant with the release of the game Donkey Kong and it was all forward from there. The technology that Nintendo would develop would soon come to include handheld games in the form of their Game Boy systems.

The company soon realized that the video game industry was where the money was. Since they had the technology, they embraced it and went full force ahead. They began developing video games in full force and remain one of the oldest intact video game console game on the market even to this day!

The very first Nintendo system – the NES – was released in 1983. The NES was an 8-bit video game console released in North America, Brazil, Europe, Asia, and Australia. Its Japanese equivalent was known as the Famicom or Family Computer.

NES is the most successful gaming console of its time in Asia and North America, since Nintendo claims to have sold over 60 million units worldwide. It helped revitalize the video

game industry following what is known as the “video game crash of 1983” where it seemed like every single console that came out was plagued by problems and doomed to be unsuccessful.

### Wii Hunting Games

The Nintendo Wii has revolutionized the computer gaming industry and while there are not a plethora of Wii hunting games available to play on this amazing new video game console, you will be able to find something to satisfy your outdoor nature while playing inside. One of the best parts of the Wii is that it provides a certain amount of movement necessary to play the game, so when you play a Wii hunting game, you may find that the experience is much like the real thing only in your own home!

One of the most popular and exciting Wii hunting games that players are all talking about is called "Hooked". It comes with a miniaturized fishing rod that you replace the Wii hand controllers with. Then you have some real hunting action. After all, even when you're fishing, you're hunting, so you may be quite surprised at the fun you can have with "Hooked".

Hooked is the only Wii hunting game on the video game console with online multi-player capabilities. You can challenge the best virtual fishermen around the world via the online Wi-Fi play available only with Wii. You can immerse yourself in the fight with realistic fishing and working up a sweat as you lean your Wii remote in every possible direction all the while reeling in the rod like crazy just to catch the big one. It is as if you actually have a rod and reel right in your own hands.

There is a wide range of fishing environments to choose from with this Wii hunting game including six photo realistic lakes to a meteorite crater turned lake to a man-made recreational reservoir. There are three exciting single-player game play modes as well. You can hone your skills in practice or time attack mode. Then you can move on to tournament mode to see if you can become the next world champion! Hooked retails for about \$59.99 and often comes with a free controller to gaming enthusiasts.

Another one of the Wii hunting games available for play is called Rapala Trophies which is also a fishing game. The best part about this game is that it offers up the choice to catch a variety of fish including brown trout, lake trout, king mackerel and Nile perch that are usually found only in the world's hottest fishing spots. Travel from the Kanai River in Alaska to Lake Okeechobee in Florida to Lake Victoria in Africa as you play through 16 game play levels based on authentic locations around the globe.

## How To Play And Enjoy Hunting Video Games

Since the Wii is a relatively new video game console, we are sure that there will be plenty more Wii hunting games available for sale in the not too distant future. For now, though, be sure to check out the Wii hunting games that are available now – Hooked and Rapala Trophies.

### Play Station

The very first Play Station video game console was developed in the early to mid 1990's by the Sony Corporation as a way to compete with Nintendo – the biggie in the video game industry. Of course, the first concept of the Sony Play Station dated way back earlier – to 1986 to be exact.

The Sony Corporation – in development of their video game systems – wasn't without its problems. This was about the time that there was extension experimentation both within the music industry as well as the video game industry. Video game developers began to realize that they could store their games on the new CD-ROMs and allow them to include more information thus making games with better graphics.

During development of the Play Station console, Sony's intent was to allow gamers to use the Nintendo cartridges as well as the new Sony gaming CD-ROMs. There was an agreement that was reached between Sony and Nintendo that would allow this to happen and research and technological development began.

However, after the announcement of this agreement, the owners of Nintendo began to read over the agreement and realized that they were handing over total control of their systems to Nintendo, they quickly rescinded that agreement.

While this was a complete shock to the Sony Corporation, they quickly decided that they had enough to work with to make their own video game console and started work on a stand alone system that would be marketed under the Play Station name. The final version of the Play Station video game console was launched into the consumer market in 1995 at a retail price of \$299.

Of course the Play Station would undergo changes and new consoles would be released in later years – each with more capabilities than the previous one. A very important part of the video game console for Sony was that the newer versions would still be able to play the games of the older versions which was an advantage for gamers as they wouldn't necessarily have to buy new games if they decided to upgrade to the newer systems.

## How To Play And Enjoy Hunting Video Games

The Play Station 2 was the first updated console closely followed by the Play Station 3. With the Play Station 3, the ability to play the old games was slightly limited as not ALL games were compatible with the new console, but most of them were. That's when, in 2006, Sony decided that this was the end of new Play Station video game consoles, although who knows what will happen in the future!

### Microsoft Xbox

It was probably inevitable that the computer software giant Microsoft would want to have its share of the video gaming market. Their first foray into this area was with the Xbox and was in direct competition with the Play Station 2 from Sony along with the Nintendo Game Cube.

The Xbox was innovative because it was the first console to incorporate a hard disk drive used primarily for storing games compressed in Zip archives with content downloaded from Xbox Live. This eliminated the need for separate memory cards as was required with other systems.

Most of the games also used the hard drive as a disk cache which led to faster game loading times. Some of the games would support custom soundtracks which was another particularly unusual feature allowed by the hard drive. Essentially an Xbox owner could rip music from standard audio CDs to the hard drive of the console so players can play their custom soundtrack in addition to the original soundtrack of Xbox games that support this feature.

The Xbox console itself was much larger and heavier than its contemporaries largely due to a bulky tray-loading DVD-ROM drive along with the standard 3 ½ inch hard drive. That found the Xbox a target of mild derision from critics who would quip that the Xbox manual should include a warning that “a falling Xbox could cause serious injury to a small child or pet”.

However, there were safety features in the Xbox that no other console system could boast themselves. These included breakaway cables for the controllers to prevent the console from being yanked from the shelf.

Critics also did not like the game controllers. The original design was quite large making it ill-suited to those with small hands and causing severe hand cramping of other users. A smaller controller was introduced eventually as the Xbox Controller S.

Unfortunately, while Microsoft is a giant in the computer software industry, they didn't realize as much success in the video game console industry. As of the end of 2006, their total losses in their gaming division totaled over \$4 billion.

## Computer Games

Of course, there are many hunting games that come in software form you can buy and download to your computer system. They are made by a variety of manufacturers and are usually readily available either in your local discount store or online.

Actually, you can also find many hunting video games that play on video game consoles that have been adapted to be played on your personal computer.

Of course, you don't necessarily have to go out and buy software if you want to play hunting games from your computer. There are also many web sites on the Internet that will allow you to play video hunting games for free directly on the web site! That's right, they're free!

Now, some of these games can get a little "cheesy" if you will as the graphics on some web sites aren't as advanced as those you can find in a classic software game, but they are fun. So what's the catch?

There are a couple, but they aren't as bad you think they might be. First, some of the web sites ask that you become members of their web site community. This is easy and non-committal. All you'll need is an e-mail address, and a user name and password that you create.

However, once you are a member of the website, you can gain access to a lot of information that these web sites have to offer. They have real-life hunting information, articles, and – best of all – message boards where you can discuss both real-life hunting as well as video hunting with other members of the web site!

Message boards are great places to talk about all sorts of things with people who share your same interests. You can brag about your hunting prowess or just chat about the latest advancements in hunting gear. What can be better than finding new friends who like what you like?

## Macintosh Mac Deer Hunting Game

The Macintosh computer is becoming increasingly popular among gamers, and for those who love hunting games, the good news is that you can play a great Macintosh mac deer hunting game that will be fun and exciting in so many ways! While many software programs are usually directed toward IBM based computer systems, more and more software companies as well as web sites are beginning to offer options for the Macintosh user as well. If you want to play a Macintosh mac deer hunting game, you actually do have a few choices that are sure to satisfy your urge to kill that thirty point buck – virtually, of course.

One of the most popular Macintosh mac deer hunting game that is out there is called Deer Drive. This is a 3d interactive arcade style video game that will put you into the game and increase your skills as you hunt. The good news about Deer Drive is that you can download it directly to your computer from various web sites and start playing right away. You will be challenged when you play Deer Drive as it all depends on how fast you can track and shoot your deer. Herds of deer are driven into your sight, and you can bag a big one with this great Macintosh mac deer hunting game!

Another game that was originally developed for the IBM system – actually originally for the Nintendo video game console system – is Deer Hunter. Since its introduction in the 1980's, the game Deer Hunter has evolved quite a bit into an exciting and innovative video game for many different platforms. That is why Deer Hunter is a very popular Macintosh mac deer hunting game. Since it has been adapted for the mac system, it has become even more popular than ever.

You can find many different games available for download on the Internet that are compatible with systems other than the IBM based systems. That is why if you go looking for a Macintosh mac deer hunting game, you will be able to find many choices both in software you can buy off the shelf of a store as well as being downloadable straight from the Internet. What you will want to do is try out a few of the different sites and do a little research so that you can find a game that will fulfill all of your expectations and make for a great gaming experience!

## Free Hunting Games

Nothing in life is free – right? Well, that's not exactly true. There are tons and tons of free hunting games available for you to play online that can satisfy any serious gamer's desire to hunt big game from their computer via the World Wide Web. Are there really free hunting games online – truly and completely free? You bet! In fact, if you were to do an Internet search for "free hunting games", you will find many, many web sites that offer this service to the every day person – and, yes, all for free!

Some of the web sites that offer up free hunting games to play only ask that you join their web site as a member. All this requires is an e-mail address and for you to create a password. Any sites that ask you for any additional information such as credit card numbers or something along those lines do not offer up free hunting games. They are misrepresenting their product, so if you find a site like this, simply close out your browser and go somewhere else.

The best part about playing free hunting games online is that you have so many choices that make the games fun and exciting. To begin with, you can hunt all kinds of game online. Whether you are itching to kill a big brown bear or just want to find a 30 point buck with your virtual bow, you can surely find games like this online. From bears to moose, rabbits to deer, there are free hunting games that give you all of these options and more.

Another great part about free hunting games is that often, the web site that offers them for play will also have a community where players can chat about their hunting prowess and some secrets, tips, and tricks that can help you in your gaming conquest. You can usually choose to play against the computer or against other players, which can be incredibly exciting. Then you can go to the message boards and brag about your own successes to others.

In fact, many of the web sites with free hunting games can get quite competitive – although it is usually through the medium of friendly banter. A lot of the web sites with free hunting games have strict rules about flaming – putting down other players needlessly – and foul language and/or harassment. If you find anyone in violation of the board's rules, you should report them right away.

## How To Play And Enjoy Hunting Video Games

Take a look on the Internet via your favorite search engine and find out just how many free hunting games are out there ready for you to play. We're willing to bet that you'll be amazed and enjoy the heck out of yourself in the process!

## Free Online Fishing Or Hunting Games

If you are interested in hunting or fishing games, rest assured that you can find all sorts of web sites on the World Wide Web that will offer you the opportunity to find free online fishing or hunting games that you can play at all times of the day or night. Almost all of these sites just ask that you register as a member by using your e-mail address, creating a user name, and creating a password. When you do this, you will become a member of their community which will give you access to all sorts of tools that can not only track your progress but also introduce you to a whole new world of friends you can talk to about online hunting and fishing.

The old phrase in life that nothing good comes free is just wrong when it comes to finding free online fishing or hunting games. There are so many sites that will allow you to play for free and hone your hunting and fishing skills without even having to leave home. You will be given access to all your statistics as you try to move up by levels and become an expert hunter or fisherman (or fisher person if you prefer).

One great thing about free online fishing or hunting games is that you can choose to play against the computer or you can play against the rest of the community. That means while you are sitting at your computer in Boise, Idaho, you could be trying to catch a bigger fish or kill a bigger deer than Sven in Norway. After all, that is what the World Wide Web is all about – connecting people all over the world with mutual interests. Then you and Sven can go on the message board of the web site and brag about your conquest or be humbled by your loss.

When you want to find free online fishing or hunting games, simply do a web search with your favorite search engine. If you enter in the words “free online fishing or hunting games”, you will find so many places to choose from, you might be overwhelmed, but don't be. Just go to each site that interests you and find out what they require for you to be able to play their free online fishing or hunting games. Then choose one – or several if you are so inclined. Play them for awhile and see which one or ones you like best. Then play away.

### Play Free Hunting Games

## Duck Hunt Coloring Pages

There are many parents who like to introduce their children to hunting at an early age, and a good way to do this is to get them some duck hunt coloring pages. Now we are not talking about coloring pages depicting anything violent or disturbing for them, but showing images of a duck hunt on coloring pages can be a good way to get children used to the sport of hunting.

A lot of people who enjoy hunting as a sport feel that showing their children what hunting entails is the responsible thing to do if they plan on allowing their children to hunt when they get older. Because duck hunting is done with guns, showing a child how to use a gun responsibly and in the correct way is very important. With the rash of violence in schools and on the streets, showing a child the right way to use and handle a gun when they are old enough must start at a young age.

Getting duck hunt coloring pages that show hunters behaving in the correct way both in the field as well as with firearms can be a great teaching tool for parents to use. While not everyone will agree with this concept, people have been teaching their children to hunt for hundreds of years. Back in the days of the pioneers, children were actually expected to go out and help get food for the family by hunting. Many people continue that tradition even today, so being sure that when it is time for the child to hunt, he or she can do so in the correct way so as not to cause harm.

You can find duck hunt coloring pages in a lot of places on the Internet. You can print them out directly to your printer at home and make as many copies as you want. Let's face it, kids like to color. When you find duck hunt coloring pages and present them to your child, explain to them what is shown in the picture and why it is important to do what the people in the picture are doing.

Duck hunt coloring pages are great ways to teach children about the concepts of hunting and the way to do it without harming anyone else. Some children may be disturbed at the thought of killing animals, but if you have duck hunting coloring pages to begin a conversation about the food chain and the necessity to kill some animals for food, you will be opening up a whole new world for them.
